*About Silicon Valley Children's Hospital Foundation ([www.svch.org](http://www.svch.org))  
Concerned physicians, business leaders, and parents created Silicon Valley Children's Hospital Foundation in the fall of 1999. This group shared the vision of making quality health care available to all children of Silicon Valley. Applied Materials, Inc. provided critical seed funding to the group which completed a needs assessment and business plan and then united local physicians, parents, community leaders and businesses, to work with hospitals in the area to centralize pediatric care in one location. SVCHF formed a partnership with Lucile Packard Children's Hospital in February 2002 to develop an easily accessible hospital dedicated to the children of Silicon Valley.*
